

M. VENKATESH

AI-FIRST FULL STACK DEVELOPER

EDUCATION

B.Sc Computer Science

2015-2018

shevaroy's collage of arts and science

GPA: 6.9

SKILLS

- Generative AI (Gemini)
- Python & Streamlit
- Next.js & TypeScript
- RAG & Prompt Engineering
- Data Scraping (ECI)
- Full Stack Development

CERTIFICATIONS

Full Stack Development with Node.js

- Besant Technologies -2023

Generative AI Mastery

- Self-Paced Specialization

PROFILE

Innovative B.Sc Computer Science Graduate (2018) with 3.5+ years of experience in building AI-powered full-stack applications. Expert in leveraging Generative AI (LLMs) to accelerate development and build modern RAG systems.

WORK EXPERIENCE

FinoVille – FinTech & Civic Data Platform

- Developed a high-performance dashboard for financial and civic data. Built an Automated Data Scraper for ECI voter records, optimizing large-scale data retrieval using Next.js and TypeScript.

GenAI PDF Studio – Document Analysis App

- Created a web application using Python and Gemini AI that enables users to chat with PDF documents. Implemented Conversation Memory and RAG logic for intelligent document summarization.

NexusBankingAI – AI Financial Assistant

- Developed a specialized AI assistant for banking institutions using Python, Gemini 1.5, and Streamlit.
- Implemented an automated Transaction Classifier to categorize bank statements and financial data.
- Built a RAG-based system to analyze banking policy documents and provide accurate, instant responses to customer queries.
- Designed a multi-agent support bot to automate routine banking inquiries and improve customer service efficiency.
